Pain Management

Chronic pain doesn't have to control your day — there are medical options. We are dedicated to and focused on the diagnosis, treatment and management of patients with chronic pain, including pain from cancer and cancer-related treatments. We are committed to helping you regain any loss of mobility, with the ultimate goal to improve your quality of life. We specialize in treatment for back and neck pain, pain associated with injuries and accidents, facial and headache pain, extremity pain and neuropathies.

Diabetes Care

A diabetes diagnosis can be overwhelming. And, it's not something you need to face alone. We have the resources and caring staff to help you be successful on your journey to manage diabetes. Diabetes is a metabolic disorder, which occurs with the body's improper use of insulin. Because insulin is needed by the body to convert glucose into energy, these failures result in abnormally high levels of glucose accumulating in the blood. Diabetes may also be a result of other medical conditions including Genetic syndromes, chemicals, drugs, malnutrition, infections, viruses and other illnesses. If you have diabetes, or think you may have diabetes, SMC can help you find a primary care physician who can help you diagnose, treat and monitor your condition. Diabetes is a life-threatening condition that, when properly managed, is easy to live with.

Ear, Nose and Throat

Our bodies are complex, and we recognize that conditions of the ear, nose and throat greatly affect quality of life. Our General Practitioner is trained in the medical treatment of the ears, nose, nasal passages and sinuses, upper pharynx (mouth and throat) and structures of the neck and face. We provide comprehensive examination and treatment.

Have you been diagnosed with a cardiovascular condition? Exploring all your options is important, especially if other doctors have run out of options to help you. our General Practitioner is experienced in treating every level of disease from the most common to the most complex conditions. We will work with you to decide the best course of treatment.

Endocrinology Care

Endocrinology is a medical specialty dealing with disorders of the endocrine system and hormone secretions. These hormone secretions acts as messengers, moving throughout the body in your blood, bringing their specific function to various parts of the body. Although every organ system secretes and responds to hormones — including the brain, lungs, heart — endocrinology focuses primarily on organs whose primary function is hormone secretion, such as Pituitary gland, Thyroid, Adrenals, Ovaries, Testes and Pancreas.

Our General Practitioner is trained in internal medicine or pediatrics, with advanced training in treating disorders of the endocrine system, such as Diabetes, Hyperthyroidism, Adrenal disorders, Metabolic bone disease, such as osteoporosis, Pituitary gland disorders, including tumors, Parathyroid gland disorders, Sex hormone disorders and Thyroid disorders, including tumors. Like all the conditions we treat, medical diagnosis and treatment are only part of the story. Our teams lead with compassion and understanding to deliver a quality of care that makes such a significant difference when facing physical challenges.

Geriatrics (Senior) Health

At a time when health issues collide with the challenges of aging, it's nice to know that there is services sensitive to your or your loved one's needs. That's why SMC offer specialized care and assessment for seniors. Our goal is to work with our doctor to help you maintain, and if possible improve, your independence in ways that respect your personal dignity. All of our physicians and other staff have special training and certification that helps them understand and respond to the specific needs of seniors.
